

## 150 DE ANI DE LA NAȘTEREA LUI SPIRU HARET (1851–1912)

Acad. RADU P. VOINEA

*Conferință rostită la „Zilele academice ieșene”, 4 octombrie 2001*

150 YEARS SINCE SPIRU HARET'S BIRTH. This condensed biography of the Romanian mathematician Spiru Haret (1851–1912) centers on his scientific excellence. His Ph.D. paper, held in 1878 in Paris, questioned the stability of the solar system for the first time in history. As Minister of National Education, Spiru Haret instated a noteworthy reform of educational system. His modern approach implied that schoolteachers not only enlighten children, but also elevate adults' cultural perception.
